[Orador 1]

I was in a life of my sister, yes? She is white, like a one. And I am, what do you say in Monerita?

Tant. Tant?

[Orador 3]

Tant, from Monerita.

[Orador 1]

And she is too similar to my mother, and I'm not, yes? So, we decide, yes? Did, how do you say among all?

[Orador 3]

Among all? Among all?

[Orador 1]

Among all. Did a, what is the N? DNA test.

[Orador 2]

Yes?

[Orador 1]

And in the test, it came out.

[Orador 2]

Result.

[Orador 1]

Result, that I don't, I was switched in the hospital, yes? And was, and I was given to her family, yes?

[Orador 3]

Okay.

[Orador 1]

So, it was, it was a surprise.

[Orador 3]

Uh-huh.

[Orador 1]

Because, because, yes? So, my mother, my mother never knew that, but I have a question for you. What would you do in that situation?

[Orador 2]

Okay, what, okay, that was an interesting story. I mean, what would you do if you realized that you were switched in the hospital?

[Orador 4]

Uh-huh.

[Orador 2]

I would find my real, like, biological family, say the thing, and I say, don't switch again, because I don't love you, but, but I would like to be adopted by my other family. Hello. Okay, but I would like to be adopted by the other family.

I mean, is that, if that happens, legally, the clinic, like the test, has to make the report. Negligence. Negligence.

[Orador 4]

Uh-huh. Uh-huh.

[Orador 2]

I know, how bad.
